

We love npr stations and wtop and still listen to them. If we want to hear oldies from the 50's 60's etc or a comedy channel, we listen to the satellite stations. Washington local stations don't have the variety we would like . Also once I start moving toward my job in Prince william county I loose reception on many DC stations. When we travel South there is virtually nothing we can find. We should have the freedom to chose stations we want to listen to.
